

# A MULTI-LEVEL, COMPUTATIONAL MODEL TO STUDY SOCIAL COMPLEXITY AND WORLD ORDER

**Clarence Dillon**

*Candidate, Computational Social Science*

Department of Computational and Data Sciences

Graduate College of Science,

George Mason University

I have been inspired to this research by ideas I have learned from many scientists, researchers and pioneers, but especially from Dr. Claudio Cioffi-Revilla, Dr. William Kennedy and Dr. John Dale –members of my dissertation committee. I am particularly indebted to Dr. Cioffi for much of the background knowledge necessary to approach this project.
